ns4.webfaction.com.	IPv4: US

WARNINGS

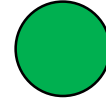

- No DNSSEC records found. Consider enabling DNSSEC, as it provides a way to validate DNS responses for data integrity.
- All the nameservers are being operated from a single domain (webfaction.com). If that domain gets compromised or goes offline, the DNS will be unavailable. Consider spreading the nameservers across multiple domains.

RECOMMENDATIONS

- No CAA records found. Consider adding CAA records, as it adds increased security by limiting which Certificate Authorities can issue certificates for this domain.

 - No DMARC records have been found. Consider configuring DMARC for improved e-mail authentication.
